Shop control:
```

```
=============

Press ESCAPE twice to leave game when in shop.

Camera controls:
================

F1/F2 -  Select car to view

F3/F4 -  Select camera in the following order
                 ChaseCam (default)
                 LeftCam
                 RevserveCam
                 RightCam
                 HeadCam
                 LeftVRCam
                 ForwardVRCam
                 RightVRCam
                 ZoomCam1
                 ZoomCam2
                 ZoomCam3

F5/F6 -  Rotate camera (Not available on ZoomCam)

F7/F8 -  Zoom in/out (Not available on ZoomCam)

F9/F10-  Adjust 'padlock' view. This follows the direction that your
         head would be pointing as you go round a corner to give the
         impression of 'G' force.

Short cuts to camera:

ALT-F1     -  Select ZoomCam1
ALT-F2     -  Select ZoomCam2
ALT-F3     -  Select ZoomCam3
ALT-F4     -  Select ChaseCam
ALT-F5     -  Select LeftCam
ALT-F6     -  Select RevserveCam
ALT-F7     -  Select RightCam
ALT-F8     -  Select HeadCam
ALT-F9     -  Select LeftVRCam
ALT-F10    -  Select ForwardVRCam
ALT-F11    -  Select RightVRCam

Network mode:
=============

To play Network SuperKarts you will need to be connected to
an IPX compatible network. Up to eight people may race against
eachother in Season or Half-Season games.

Start SuperKarts by entering:

    SK /NET

or

    SK /NET /C  - If you wish this machine to act as a computer player
```

You will be presented with a menu which contains the following:

    START NET GAME   - Select this when you have filled in the rest.
    NAME: NONE   - Enter your own 'full' name here.
    HANDLE: NONE   - Enter a short 'handle' or initials.
    PLAYERS: 2   - Change this to however many people want to
play.
    GAME ID: 0   - You should use a different ID for each
                            simultaneous game of NetKarts running on your
                            network.

When you select 'START NET GAME' your computer will search the network
for anyone else whose game attributes are the same, ie the same number of
players and the same Game ID.

One person will be selected to control the Game Type, Difficulty Level
and Race Length. This person's name will be highlighted at the top of
your menu screens as 'GAME CONTROLLER: xxxxx'.

If you are not the controller you should simply select 'NEW GAME' and
then
'GO KARTING'.

That's about it.

HINT: If you want to lose friends quickly try dropping oil in front
      of them...

SEASON.TXT
==========

This file is generated in your C:\KART directory every time you race in
season mode and contains detailed information about each race.
